

How to use the UKKA Kidney PREM data portal

Kidney PREM data is available for you to view via the online portal: ukkidney.org/audit-research/data-portal/prem in aggregate format, at Country, Region, Main Centre and Site levels. Responses of <10 have been removed to preserve patient anonymity.

On entering the portal, click 'full screen' on the bottom right, to improve readability (Fig 1).

Legend: Six (Green), Five (Light Green), Three (Yellow), Two (Red), Missing (Grey), Don't Know (Teal)

Number/Percent: Number, Percent

Figure 1

Kidney PREM consists of 39 questions over 14 domains. Use the panel below the tables to select the question to view. It is not possible to select multiple questions due to the volume of data.

Data in the portal is grouped by geographical location (Country, Region, Main Centre, and site). Data presented in the bar-chart and the table can be expanded or contracted to amalgamate sites, centres, regions or countries by using the small (+) and (-) symbols which appear when you hover over the geography title in the chart or table (Fig 2).

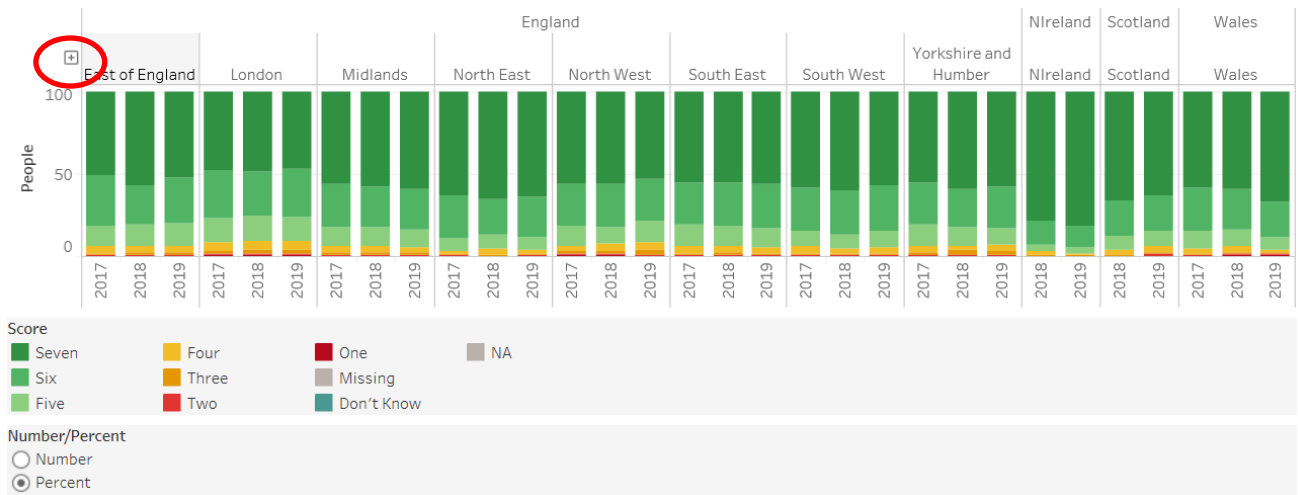

Figure 2

It is also possible to restrict the data to regions, centres or satellites using the filters to the right of the table/chart.

When interpreting the data at group level it is important to consider the sample sizes, which can be seen by hovering over the column or cell, showing both value and proportion as People and Percent (Fig 3). 'People' is the number of people who gave each response (one to seven, not applicable, don't know or missing), 'Percent' is the proportion of the total group who gave a numerical response (i.e. one to seven).
