

# **COVID-19 surveillance report for renal centres in the UK**

**All regions and centres – up to 4 November 2020**

## ABOUT THIS REPORT

These reports are produced by the UK Renal Registry (UKRR) using data submitted by renal centres in response to the COVID-19 pandemic. The first report was circulated on Friday 27 March 2020.

The reports are primarily about adults aged  $\geq 18$  years, as well as young adults aged 16–18 years, if they are under the care of an adult renal centre. However, also reported in the key points are aggregate data submitted by paediatric renal centres.

The data collected are deliberately limited so as not to add significantly to the burden of work in renal centres.

## DEFINITIONS

A renal patient with COVID-19 is:

- an individual who has a positive laboratory result for SARS-COV-2.

This definition was updated for the report on 28 October 2020 to reflect changes and variability in COVID-19 testing strategies across renal centres.

A renal patient whose death is attributed to COVID-19 is:

- an individual who died within 28 days of a positive laboratory result for SARS-COV-2.

This definition was updated for the report on 26 August 2020 following the introduction of the new UK-wide methodology to record COVID-19 deaths.

## SUGGESTED CITATION & DISCLAIMER

UK Renal Registry (2020) COVID-19 surveillance report for renal centres in the UK: All regions and centres. The Renal Association, Bristol, UK.

## KEY POINTS

For the week ending **Wednesday 4 November 2020**:

- **adult renal centres** – 48 of the 51 centres in England, 4 of the 5 centres in Northern Ireland and 5 of the 5 centres in Wales submitted COVID-19 data to the UK Renal Registry (UKRR). No updated cumulative data were received from the Scottish Renal Registry.
- **paediatric renal centres** – 13 of the 13 centres in England, Northern Ireland, Scotland and Wales submitted COVID-19 data to the UKRR.

### **The most recent 10 weeks of the pandemic in adult renal centres (RRT patients)**

All regions and countries reached a peak in new cases around the end of March/beginning of April. Until the start of September, all three UK countries reported only small numbers of new cases. Over the last month numbers of new cases have increased, particularly in northern regions of England and, more recently, in Midlands West, London and the South West.

In **adult renal centres in England**:

- in the last week (Thurs–Wed) the number of new laboratory-confirmed cases of COVID-19 was 174
- up to 4 November the cumulative number of laboratory-confirmed cases of COVID-19 was 5,308
- in the last week (Thurs–Wed) the number of new deaths attributed to COVID-19 was 19
- up to 4 November the cumulative number of deaths attributed to COVID-19 was 1,411.

In **adult renal centres in Northern Ireland**:

- in the last week (Thurs–Wed) the number of new laboratory-confirmed cases of COVID-19 was 2
- up to 4 November the cumulative number of laboratory-confirmed cases of COVID-19 was 59
- in the last week (Thurs–Wed) the number of new deaths attributed to COVID-19 was 1
- up to 4 November the cumulative number of deaths attributed to COVID-19 was 11.

In **adult renal centres in Wales**:

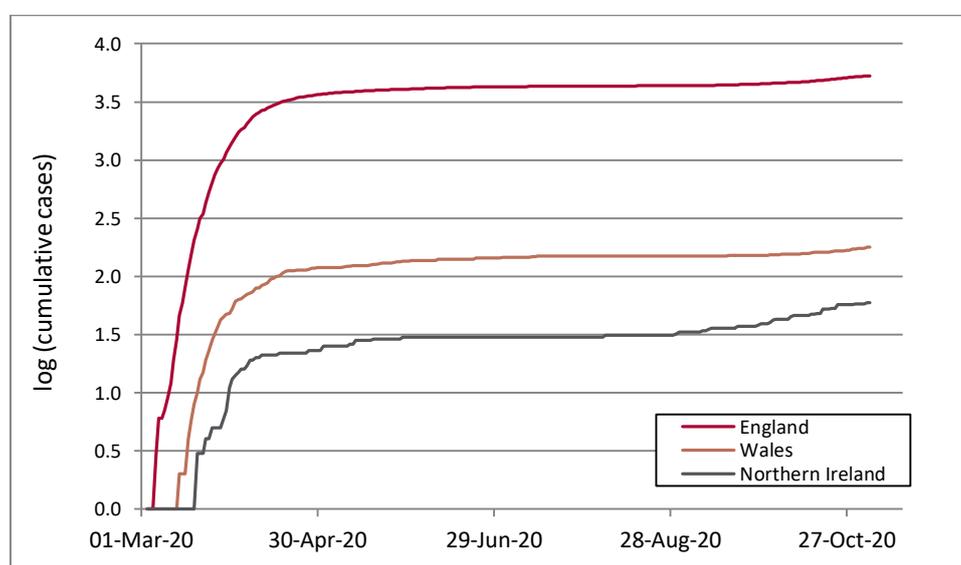

- in the last week (Thurs–Wed) the number of new laboratory-confirmed cases of COVID-19 was 11
- up to 4 November the cumulative number of laboratory-confirmed cases of COVID-19 was 179
- in the last week (Thurs–Wed) the number of new deaths attributed to COVID-19 was 0
- up to 4 November the cumulative number of deaths attributed to COVID-19 was 47.

### In adult renal centres in Scotland:

No updated cumulative data were received from the Scottish Renal Registry – see last week’s report (‘All regions and centres – up to 28 October 2020’) for cumulative Scottish data up to 22 September 2020.

### The course of the pandemic in adult renal centres (CKD and RRT patients)

Figure 1 shows the cumulative number of laboratory-confirmed COVID-19 cases over the course of the pandemic in adult renal centres in England, Northern Ireland and Wales. As can be seen, at the start of the pandemic, the number of cases climbed steeply in all three countries, reaching a particularly high level in England, before plateauing between the start of May and September. Cases then started to increase again, initially in Northern Ireland and then shortly afterwards also in England and Wales, albeit so far at a slower pace than during the first wave of the pandemic.

**Figure 1** Log cumulative counts of laboratory-confirmed COVID-19 cases in CKD and RRT patients between 1 March and 4 November 2020 in adult renal centres in England, Northern Ireland and Wales

### In paediatric renal centres in England, Northern Ireland, Scotland and Wales:

- in the last week (Thurs–Wed) the number of new laboratory-confirmed cases of COVID-19 was 1
- up to 4 November the cumulative number of laboratory-confirmed cases of COVID-19 was 18
- There has been one paediatric death following a positive test for SARS-COV-2, but this occurred almost 4 months after the test result.

## SURVEILLANCE

<sup>1</sup>Numbers of deaths attributed to COVID-19 are lower than in previous reports because the new definition restricts a COVID-19 death to one that occurred within 28 days of a positive test.

<sup>2</sup>Data from University Hospitals Birmingham NHS Foundation Trust (Heartlands Hospital & Queen Elizabeth Hospital).

The delay between the NHS tracing process and producing this report may result in a possible underestimation of the number of deaths.

Blank cells indicate that the renal centre did not submit data to the UKRR.

CKD – chronic kidney disease (i.e. patients with CKD not on RRT); HHD – home haemodialysis; HT – home therapies; ICHD – in-centre haemodialysis; PD – peritoneal dialysis; RRT – renal replacement therapy; TPLT – transplant; Missing – treatment modality data missing

**Table 3** Number of new reported laboratory-confirmed COVID-19 cases in RRT patients within the last 10 weeks in adult renal centres in England, Northern Ireland and Wales by region, renal centre and country

<sup>1</sup>Data from University Hospitals Birmingham NHS Foundation Trust (Heartlands Hospital & Queen Elizabeth Hospital).

<sup>2</sup>The number of cases reported in the most recent week is likely to be an underestimation, because of the lag in reporting to the UKRR.

Blank cells indicate that the renal centre did not submit data to the UKRR.

CKD – chronic kidney disease (i.e. patients with CKD not on RRT); HHD – home haemodialysis; HT – home therapies; ICHD – in-centre haemodialysis; PD – peritoneal dialysis; RRT – renal replacement therapy; TPLT – transplant; Missing – treatment modality data missing
