

COVID-19 surveillance report for renal centres in the UK

All regions and centres – up to 9 September 2020

ABOUT THIS REPORT

These reports are produced by the UK Renal Registry (UKRR) using data submitted by renal centres in response to the COVID-19 pandemic. The first report was circulated on Friday 27 March 2020.

The reports are primarily about adults aged ≥ 18 years, as well as young adults aged 16–18 years, if they are under the care of an adult renal centre. However, also reported in the key points are aggregate data submitted by paediatric renal centres.

The data collected are deliberately limited so as not to add significantly to the burden of work in renal centres.

DEFINITIONS

A laboratory-confirmed COVID-19 case is a renal patient who has both:

- clinical evidence of COVID-19 disease
- a positive laboratory result for SARS-COV-2.

A renal patient whose death is attributed to COVID-19 is:

- an individual who died within 28 days of a positive laboratory result for SARS-COV-2.

This definition was updated for the report on 26 August 2020 following the introduction of the new UK-wide methodology to record COVID-19 deaths.

SUGGESTED CITATION & DISCLAIMER

UK Renal Registry (2020) COVID-19 surveillance report for renal centres in the UK: All regions and centres. The Renal Association, Bristol, UK.

Publications based on the data presented in this report must include the citation detailed above and the following disclaimer:

The data reported here have been supplied by the UKRR of the Renal Association. The interpretation and reporting of these data are the responsibility of the authors and in no way should be seen as an official policy or interpretation of the UKRR or the Renal Association.

KEY POINTS

For the week ending **Wednesday 9 September 2020**:

- **adult renal centres** – 49 of the 51 centres in England, 5 of the 5 centres in Northern Ireland and 4 of the 5 centres in Wales submitted COVID-19 data to the UK Renal Registry (UKRR). Cumulative data for Scotland will be submitted at the end of September.
- **paediatric renal centres** – 13 of the 13 centres in England, Northern Ireland, Scotland and Wales submitted COVID-19 data to the UKRR.

The trend in the number of new COVID-19 cases reported in adult RRT patients in the last 10 weeks remains low and stable across the 3 countries that submit patient-level data. Consequently, we have removed table 3 from this report, but will re-introduce it if at any stage case numbers begin to rise significantly again.

Following the introduction of the new UK-wide methodology to record COVID-19 deaths, which has been endorsed by the UK chief medical officers, COVID-19 deaths reported in table 2 of this report are now restricted to those that occurred within 28 days of a positive laboratory result for SARS-COV-2.

In **adult renal centres in England**:

- in the last week (Thurs–Wed) the number of new laboratory-confirmed cases of COVID-19 was 11
- up to 9 September the cumulative number of laboratory-confirmed cases of COVID-19 was 4,360
- in the last week (Thurs–Wed) the number of new deaths attributed to COVID-19 was 1
- up to 9 September the cumulative number of deaths attributed to COVID-19 was 1,294.

In **adult renal centres in Northern Ireland**:

- in the last week (Thurs–Wed) the number of new laboratory-confirmed cases of COVID-19 was 1
- up to 9 September the cumulative number of laboratory-confirmed cases of COVID-19 was 32
- in the last week (Thurs–Wed) the number of new deaths attributed to COVID-19 was 0
- up to 9 September the cumulative number of deaths attributed to COVID-19 was 6.

In adult renal centres in Scotland:

- Scotland reports the cumulative number of laboratory-confirmed COVID-19 cases and the cumulative number of deaths attributed to COVID-19 at the end of each month.

In adult renal centres in Wales:

- in the last week (Thurs–Wed) the number of new laboratory-confirmed cases of COVID-19 was 0
- up to 9 September the cumulative number of laboratory-confirmed cases of COVID-19 was 149
- in the last week (Thurs–Wed) the number of new deaths attributed to COVID-19 was 0
- up to 9 September the cumulative number of deaths attributed to COVID-19 was 46.

In paediatric renal centres in England, Northern Ireland, Scotland and Wales:

- in the last week (Thurs–Wed) the number of new laboratory-confirmed cases of COVID-19 was 0
- up to 9 September the cumulative number of laboratory-confirmed cases of COVID-19 was 10 (2 cases have been reported since the last report, but both occurred at the end of August)
- There has been one paediatric death following a positive test for SARS-COV-2, but this occurred almost 4 months after the test result.

SURVEILLANCE

ALL REGIONS AND ADULT CENTRES IN ENGLAND, NORTHERN IRELAND, SCOTLAND AND WALES

Table 1 Number of new and cumulative reported laboratory-confirmed COVID-19 cases in CKD and RRT patients within the last 7 days (Thursday 3 September to Wednesday 9 September 2020) and up to Wednesday 9 September 2020, respectively, in adult renal centres in England, Northern Ireland, Scotland and Wales by region, renal centre and country

¹Data from University Hospitals Birmingham NHS Foundation Trust (Heartlands Hospital & Queen Elizabeth Hospital).

²The cumulative number of CKD patients with a positive test is high in Shrewsbury because of active testing in the community.

³Scotland reported cumulative cases up to 18 August 2020.

Blank cells indicate that the renal centre did not submit data to the UKRR.

CKD – chronic kidney disease (i.e. patients with CKD not on RRT); HHD – home haemodialysis; HT – home therapies; ICHD – in-centre haemodialysis; PD – peritoneal dialysis; RRT – renal replacement therapy; TPLT – transplant; Missing – treatment modality data missing

Table 2 Number of new and cumulative reported deaths within 28 days of laboratory-confirmed COVID-19 in CKD and RRT patients within the last 7 days (Thursday 3 September to Wednesday 9 September 2020) and up to Wednesday 9 September 2020, respectively, in adult renal centres in England, Northern Ireland, Scotland and Wales by region, renal centre and country

¹Numbers of deaths attributed to COVID-19 are lower than in previous reports because the new definition restricts a COVID-19 death to one that occurred within 28 days of a positive test.

²Data from University Hospitals Birmingham NHS Foundation Trust (Heartlands Hospital & Queen Elizabeth Hospital).

³Scotland reported cumulative cases up to 18 August 2020.

The delay between the NHS tracing process and producing this report may result in a possible underestimation of the number of deaths.

Blank cells indicate that the renal centre did not submit data to the UKRR.

CKD – chronic kidney disease (i.e. patients with CKD not on RRT); HHD – home haemodialysis; HT – home therapies; ICHD – in-centre haemodialysis; PD – peritoneal dialysis; RRT – renal replacement therapy; TPLT – transplant; Missing – treatment modality data missing
