

UK Renal Registry 14th Annual Report: Appendix H Coding: Ethnicity, EDTA Primary Renal Diagnoses, EDTA Causes of Death

H1: Ethnicity coding

Ethnicity data is recorded in the clinical information systems in the individual renal centres in the format of 9S... read codes. If extracted from local PAS systems in a different format, it is recoded to the 9S... format by the centre, before being sent to the UKRR. For report analyses, ethnic categories are condensed into five groups (White, Asian, Black, Chinese and other). For some analyses Chinese are grouped into other.
