## Appendix 1 - Abstract presentations and posters

### Oral presentations – Thursday 26<sup>th</sup> January, 15:30

Are white cells in children's urine diagnostic or a distraction, and does collection and culture method matter? New data from 4910 acutely unwell children - *Jong Eun Song*

Urinary complement components of the alternative and lectin pathways in children with IgA vasculitis nephritis – *Julien Marro*

Paediatric Screening for CKD in an established CKDu-hotspot in Ginnoruwa, Sri Lanka – *Maduri Raja*

Access to kidney transplantation and re-transplantation of children transplanted between 1978 and 2019: an ERA Registry analysis – *Evgenia Preka*

### Flash abstracts - Thursday 26<sup>th</sup> January, 15:30

Development of a virtual-reality based educational tool for peritoneal dialysis – *Ben Reynolds*

A prospective observational study of acute kidney injury (AKI) recognition and management for inpatients in a Paediatric Tertiary Centre – *Danielle Furnell*

National clinical outcomes in children with multi-organ transplants: an update from the UNIQUE study – *Alicia Paessler*

Early steroid withdrawal reduces prevalence of hypertension in children following kidney transplantation – *Tom Dowsett*

Are we testing children's bloody urine correctly? Retrospective review of R194 haematuria genetic panel testing for children across Wales - *Jong Eun Song*

Antibiotic prophylaxis at the time of peritoneal dialysis catheter insertion – *Delwyn Nagra*

Correlation between Clinical Outcomes and Quality of Life of Paediatric Renal Transplant Recipients – *Maura Scott*

Alport syndrome: Are We Putting Evidence into Practice – *Samantha Williamson*

### Virtual posters

Outcomes of Lumasiran Use in Hyperoxaluria Type 1 – *Samantha Williamson*

Investigating outcomes in the use of increased risk donor organs in paediatric solid-organ transplantation: a systematic review – *Sruthi Kallath*

There is lack of focused services for the management of paediatric patients with failed kidney transplants - results of BTS survey of paediatric practice in the UK – *Jelena Stojanovic*

Tackling vomiting in infants and children with CKD: A survey of paediatric renal dietitians and carers – *Nabil Melhem*

Possible HLA sensitisation in a paediatric renal transplant cohort following live Varicella Zoster vaccination – *Katherine Mounsey*

*Posters (cont.)*

Key stakeholders' perspectives on the development of an early dietary phosphate self-management strategy for children and young people with chronic kidney disease stages 1-3: A Modified Delphi Consensus Process – *Pearl Pugh*

First report on the use of rectus sheath fascia for abdominal closure following simultaneous liver and kidney transplant in a complex paediatric patient with MMA - when multidisciplinary approach achieves good clinical outcomes – *Alicia Paessler*

Biopsy proven acute rejection in paediatric kidney transplantation: A retrospective study of the effects on kidney graft function – *Roger Deering*

Bilateral Vesico-Ureteric Junction obstruction in paediatric patients with Posterior Urethral Valves, a rare cause of Acute Kidney Injury – *Colin Higgins*

Exploring patient, family and clinician perspectives about the psychosocial factors influencing access to kidney transplantation and transplant outcomes for children - *Ji Soo Kim*

A study on current practice and outcome of renal biopsies in children in a tertiary care nephrology unit – *Samanthika Egodawaththe*

You may have missed it but everything changed: A landmark court of protection ruling that will affect paediatric kidney transplantation for a generation to come - *Dean Wallace* *withdrawn*

Low yield from imaging after non E. coli urine tract infections in children treated in primary care and emergency department – *Yincent Tse* *withdrawn*

Cardiovascular outcomes improve in children with renovascular hypertension following endovascular and surgical interventions – *Emily Redhead* *withdrawn*
